

Authority control [under development]

Authority records can only be loaded via batch, and authority records are not currently searchable or editable.

Full authority capability is something the Evergreen Indiana Cataloging Committee continues to request. At this point in time, no Authority Control policy has been implemented since the authority functions are so limited, but catalogers are requested to make their best efforts to use established forms for headings.

The Library of Congress Authority records may be searched here:

<http://authorities.loc.gov/>

Note that series authority records are searched under Title Authority Headings.

When authority control is implemented, catalogers will be required take the Evergreen Indiana Cataloging workshop in order to edit authority records and/or upload new authority records.
